

## NOTICE OF ROAD CLOSURE: WHITMAN WAY

### Peninsula Pipeline Seismic Upgrade (PPSU) Project

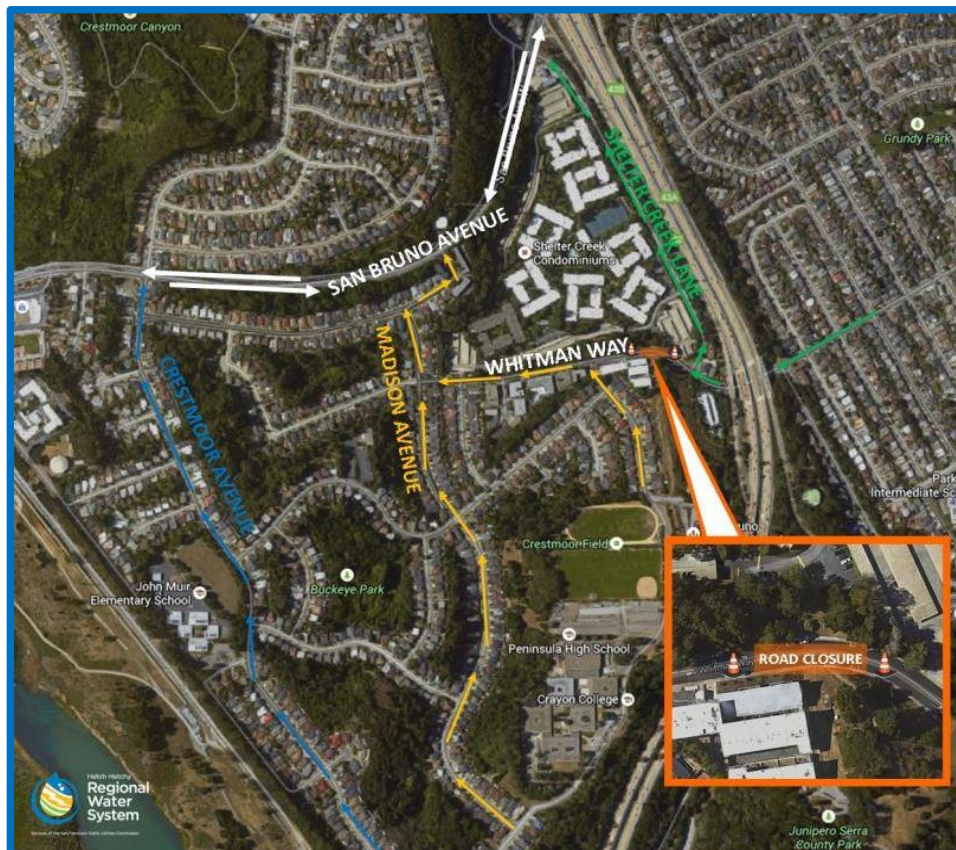

Beginning as early as **Thursday, September 3**, Whitman Way will be closed between Shelter Creek Lane and Courtland Drive from **9 a.m. to 3:30 p.m.** for backfilling and repaving across Whitman Way as part of the Peninsula Pipeline Seismic Upgrade (PPSU) Project. Whitman Way will reopen at the end of each work day at **3:30 p.m.**

Whitman Way will be closed during the following time periods:

- **Thursday, September 3 and Friday, September 4**
- **Tuesday, September 8 through Friday, September 11**
- **Monday, September 14 through Friday, September 18**

During this closure, all traffic will be detoured to San Bruno Avenue via Shelter Creek Lane, Madison Avenue and Crestmoor Drive. For more information and updates about this closure, please call the 24-hour answering service at **866-973-1476** or subscribe to our blog, [www.sfwater.org/Peninsula](http://www.sfwater.org/Peninsula) to receive project updates.

The PPSU project includes seismic upgrades to three Hetch Hetchy regional water delivery pipelines located in Northern San Mateo County. This project will ensure the pipelines can continue to deliver water to customers after an emergency.

*Please reference this map to access San Bruno Avenue during the full closure of Whitman Way.*

## The Water System Improvement Program

The San Francisco Public Utilities Commission's (SFPUC) Water System Improvement Program (WSIP) is a \$4.6 billion bond-funded program to repair, replace and retrofit our aging water infrastructure.

As part of WSIP, the Peninsula Pipelines Seismic Upgrade (PPSU) Project is one of more than 80 WSIP projects being undertaken by the San Francisco Public Utilities Commission (SFPUC).

The Hetch Hetchy Water System was built in the early 20th century, and critical components have reached the end of their useful life and are vulnerable to earthquakes. The repair, replacement and seismic upgrades taking place are designed to provide the SFPUC's 2.6 million customers with a consistently reliable, high-quality water supply, following a major earthquake or drought.

The PPSU project consists of seismic upgrades to three Hetch Hetchy regional water delivery pipelines located in San Mateo County. The pipelines in need of repair are known as San Andreas Pipelines No. 2 and 3, and Sunset Supply Branch Pipeline. Construction is slated to start in April 2014.
